

HOME AUTOMATION

THE 'SMART HOME'

Create the lifestyle you have earned and turn your home space into a hub of comfort and convenience using Automation and Smart Home technology. Entertain with ease not having to run around the home to set lights, shades and music to the perfect ambience. Enjoy music and video in any room you want. When you leave for work in the morning, press the "Away" button to turn off all the lights, lock doors, arm the security system, set the temperature, lower shades, and power down non-essential devices. Press a 'Goodnight' button that will put your house to sleep, turning off all lights and locking all doors. With your phone in hand you have total smart control of your entire house right at your fingertips. If it has a power switch.. We can automate it.

ACCESS

MUSIC

Music in one room or music throughout your home. We can automate your sound system so you can stream your favourite music throughout your home, controlling each zone separately. Create preset 'Scenes' with the music you love so the right music will always come on when you need it to.

TV / VIDEO

It's time to elevate your family room entertainment experience. With a single remote you can control virtually everything in your media cabinet and more. Consolidate all your TV remotes into one remote including Foxtel! Start your movie playing by using voice control.

LIGHTING

Control your lights from anywhere. Set-up preset lighting scenes to coordinate with your lifestyle. Turn your lights on and off, dim or change colour all by using your voice and without leaving the couch. Create custom engraved keypads.

COMFORT

Consolidate all your remotes into one Control4 smart remote. Program the heater or AC to come on 15 minutes before you get home.

Turn off all lights, TVs and lock your doors from the comfort of your bed.

SECURITY

Arm/disarm your system and check your cameras from anywhere in the world. Set-up custom responses to alarm activation such as lights turning on and off.

ACCESS

View who is at your gate and decide whether to let them in, whether you are home or on the other side of the world. Automate your gate to lock at dusk every night and unlock again in the morning.

IN-CEILING SPEAKERS

Perfect for filling small, medium and large rooms or an entire home with sound. Most commonly used for home theatre systems and multi room audio. These speakers are flush-mounted into the ceiling and look amazing.

IN-WALL THEATRE

In-wall home theatre speakers take up minimal space whilst delivering maximum impact. Today's in-wall technology is designed specifically for the most critical listener, rivaling any cabinet speaker they have the added benefit of disappearing into the décor or even becoming truly invisible.

BOXED SUBWOOFER

Ideally placed in the corner of a room, this bad boy provides all of the bottom end bass kick that music needs.

TOWER SPEAKER

Designed for High Fidelity listening and utilised in pairs. These are great for audio enthusiasts and home theatres.

PENDANT SPEAKER

An ideal choice for rooms or venues with open architecture or high ceilings.

IN-WALL SUBWOOFER

Hiding a subwoofer in a wall or ceiling is visually appealing whilst still delivering the performance of having a large boxed subwoofer placed in the corner collecting dust.

FLUSH-MOUNT SPEAKERS

Flush-mount speakers are designed to be almost invisible with their minimalist appearance.

Featuring easily paintable grilles, no bezel or visible mounting flange, flush-mount speakers blend in with the décor and can be installed in-ceiling, in-wall, or even behind gyprock and hidden completely out of view...truly invisible.

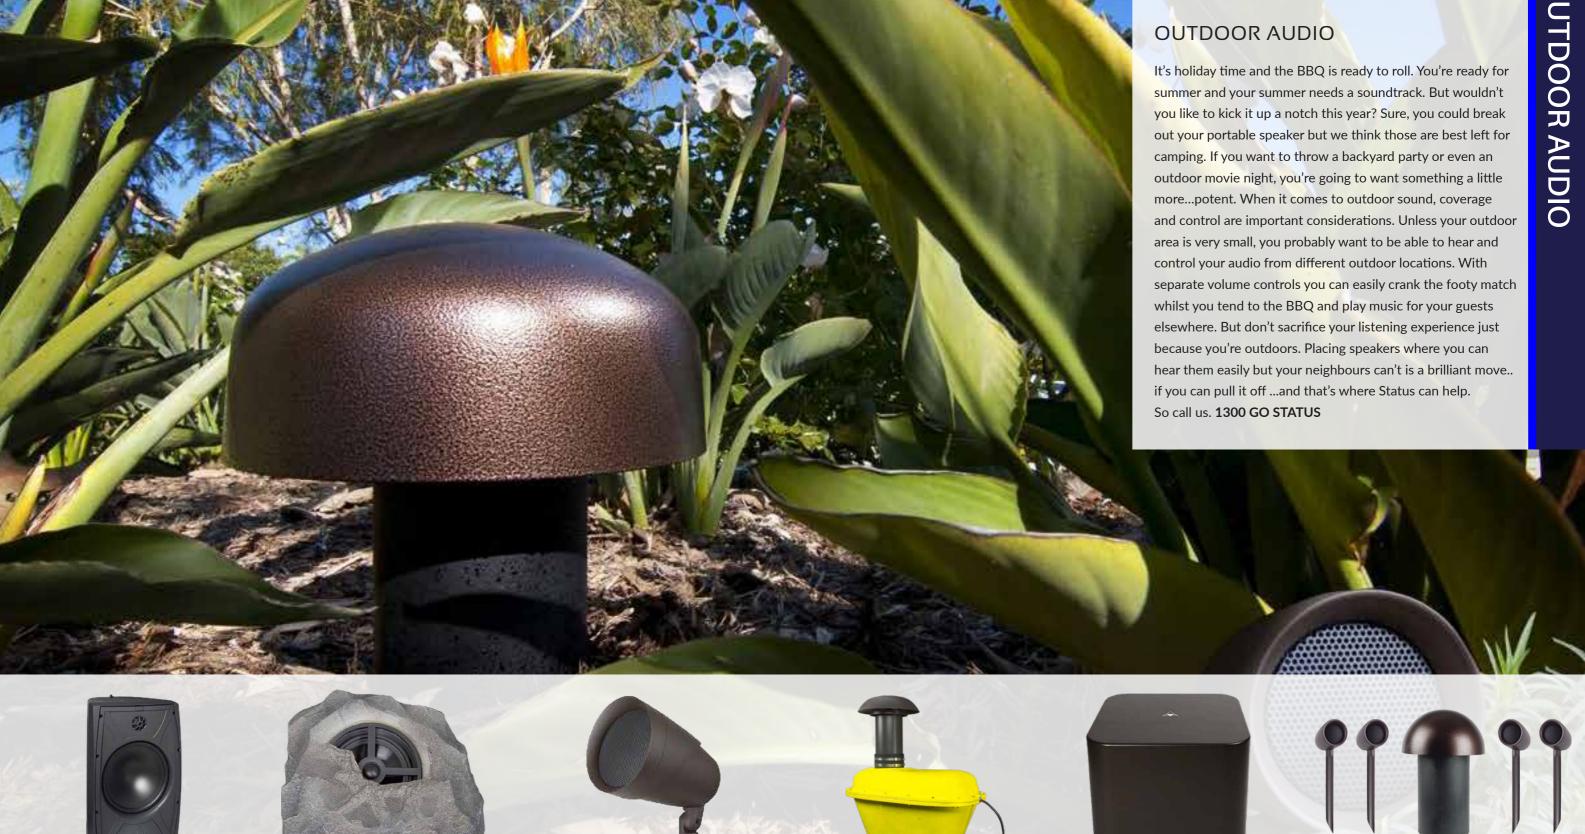

WIRELESS SPEAKERS

Wireless audio systems allow you to build a multi-room audio system throughout your home zone-by-zone as your budget allows. A smart speaker system that streams all your favourite music to any room and can consist of different sized speakers, soundbar and subwoofer. Control your music with one simple app, and fill your home with pure, immersive sound.

PATIO SPEAKER

Patio/boxed speakers are perfect for courtyards and patios, are fully weatherproof and come in a range of sizes to suit your décor.

ROCK SPEAKER

Rock speakers come in natural colours and textures and are designed to hide in garden beds and disappear into their surroundings. Group them with some patio speakers for a quality yet simple outdoor audio setup.

LANDSCAPE SPEAKER

Available in multiple sizes, theses speakers are easily mounted in the ground with a stake, or up higher in a tree.

UNDERGROUND SUB

A subterranean subwoofer is buried under the ground amongst foliage to give maximum bass impact whilst blending in with the landscaping. It makes your outdoor audio sound amazing.

ABOVE GROUND SUB

IT'S ALL ABOUT THAT BASS

As outdoor speakers are more limited in the bass department (open space wont interact with the bass waves in the same manner as four walls) adding an outdoor subwoofer is important if you crave that visceral kick in the guts.

ARRAY SYSTEM

Featuring multiple satellite speakers and a below-ground subwoofer that is designed to fill areas of up to 2000 square feet with a perfectly even blanket of high quality sound. With everything hidden under plants, crystal clear music seemingly emanates from the foliage, creating atmosphere and ambience.

ART FRAME TV

Switch from TV mode to Art mode with the touch of a button. An art frame TV is designed to make every moment beautiful. Enhance your living areas with art, entertainment and style. Choose an artwork to display when the TV is off or cycle through your favourites.

MOTORISED ART SCREEN

The artwork ascends or descends with the touch of a remote inside a beautiful frame. When the screen or flat panel display is not in use, the digital art-on canvas image of your choosing is displayed within the frame. When your artwork is retracted, the flat panel display is visible for viewing.

FLATSCREEN 'SMART' TV

A great TV is more than a screen in your home. Encased in exceptional designs and offering seamless installation options, plus simple control and content access, Smart TVs are a streamlined solution to help create beautiful living spaces.

FIXED PROJECTOR SCREEN

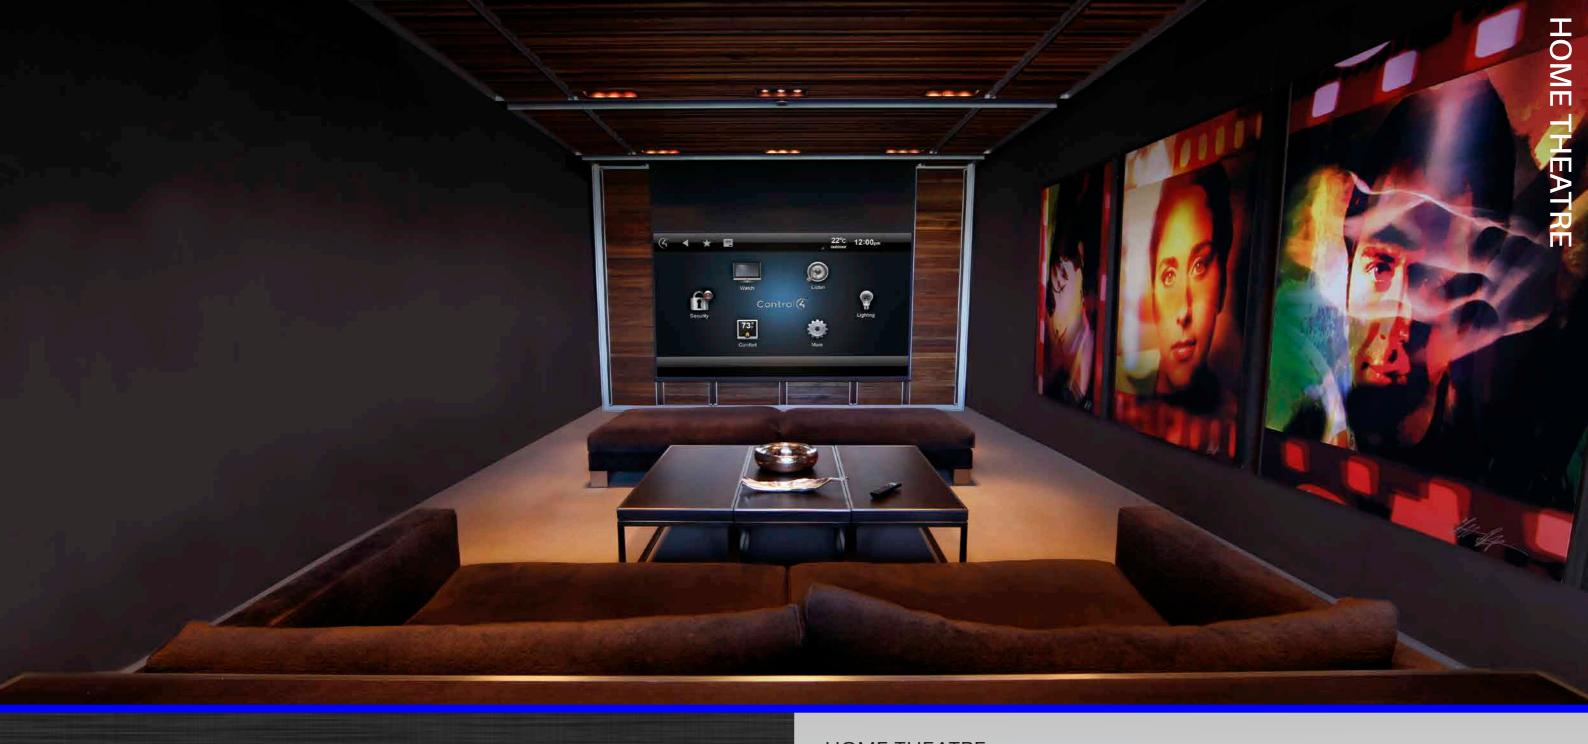

A fixed screen is mounted to your wall improving black levels and the colour spectrum so you can get the most out of your projector.

MOTORISED SCREEN

Keep the projector screen out of sight and out of mind when not in use. Options range from externally mounted units on-wall or suspended. Flush mounted in-ceiling and in-floor are available as well.

PROJECTORS

There is a wide range of projectors on the market. We assess the size of your space and required application to recommend the perfect solution for your specific need.

SURROUND SOUND ...IT'S ALL AROUND YOU

Kick the kids out and convert their bedroom into your very own media room.

Enhance your audio experience when watching footy or the latest new release. Customise your

Surround Sound package to suit your home and budget and make use of your existing AV equipment.

Pump it up to your liking with larger speakers, bigger subs and more powerful amplification.

PROJECTION ...IT'S EYE-OPENING

Watch movies the way filmmakers intended. 4K Technology delivers astonishing picture quality with every subtle intricacy captured. Technology refines surface details for true-to-life images that pop off the screen.

CUSTOM AUTOMATION ... SIMPLIFY YOUR LIFE

Imagine sitting down to watch a movie with the family.. With the touch of a button the blinds close, the lights dim, projector fires up, screen comes down and the surround sound speakers kick in with that opening sound we all know from the start of every Hollywood movie.. All that's missing now is a robotic arm passing you a cold beer!

HOME THEATRE

Design a jaw-dropping home theatre that rivals any cinema. Incorporate immersive, high-resolution audio, high-definition video, and customised lighting to create the ultimate experience. All equipment can be tucked away in a closet and controlled easily from one remote or touch screen. With the touch of a button automatically turn on all the equipment, dim the lights and start the movie playing. Our home theatres provide a fantastic escape into the magical world of the movies, into the thick of a sports game or wherever your heart desires. Take your family to the movies.. At home.

- >STEP 1: ADD PROJECTOR AND SCREEN
- >STEP 2: INSERT KILLER SURROUND SOUND SYSTEM
- >STEP 3: ADD EPIC AUTOMATION:

"If you crave the kind of audio that will ruffle the neighbours six blocks away, we have speakers for that too."

Get into bed at the end of the night, pick up your priorie and more one button. Automatically everything you have programmed in will switch off - Lights, TVs, heating, air-con, stove, oven, music, projector, screen...The list goes on!

You can go to sleep knowing that you are saving money and, better yet, didn't have to go around the house checking everything. Great for safety too.

REMOTE ACCESS

Access your security video feed remotely from your smart phone, from anywhere in the world. Check in on your home while you're away and monitor cameras, check

locks, adjust the temperature, or even turn on and off the lights so as to trick burglars. You can program your irrigation system so you can water your plants while you're away or trigger your heating to come on before you arrive home. 10 SMARTHOME

THAT WILL

IMPROVE YOUR LIFE

Simplify your life with video equipment in the which button to press.

FROM A MILLION TO ONE

Simplify your life with one hand-held remote that gives you easy access to all audio and video equipment in the home. No longer do you need to know which remote to use or which button to press to fire up your system. Select Watch and pick what you want to watch, and all the buttons on your smart remote control the device you are watching. The same remote can also be programmed to control the shades, temperature, lights, and more. Too Fasy.

TEN
THINGS
WERETALKING ABOUT
COMPILED BY STATUS

WHEN >> THEN

Control4 provides homeowners with the direct ability to create smart home actions when a button is pressed, when motion is detected, when a condition occurs, when it's a specific time, or when a door is opened or closed. For example, with When >> Then, homeowners can change the schedule for the porch light, change which music plays when a living room keypad button is pressed, or send a push notification when the garage door is opened.

ENERGY SAVINGS

Remotely check your home and switch things off; program your appliances to monitor themselves-

SMART thermostat for climate control; Motion sensors in kids' room switches things off when unattended for more than five minutes; Save up to 20% off your monthly electricity bill!

VOICE CONTROL

We've all been there—walking through the door into a dark house, arms full. Wouldn't it be nice to tell your house to offer a helping hand? Now you can. A simple voice command—such as "Alexa, Dad's home"—lights up the hallway and kitchen, fires up your favourite Pandora station, while the door locks itself behind you. This is Control4 Home Automation with Amazon Echo - a Bluetooth speaker that doubles as a personal assistant and smart-home controller and goes by the name "Alexa".

Voice control allows you to activate or control a wide range of home automation and AV devices simply using your voice. We believe Voice Control is not a trend that is likely to fizzle out, but rather an indicator of more advanced home technology yet to come.

FAVOURITES
Save each person's preferer

Save each person's preferences under a button named "Favourite" and find your own personal design without having to fiddle around adjusting settings. You can have a favourite- Playlist; TV Channel; Lighting setting; Mood setting; Volume setting and more.

PERSONALISED LIVING

Increase the comfort factor in your life with personalised settings that can be activated on a schedule, automatically, or with a tap of your phone. Personalise your home to suit your day-to-day life and customise it to your family routine.

Landscape lighting can turn on automatically at sunset and off again at sunrise. When you come home at night and the garage door opens, program the lights to turn on leading up to your door. Watching TV when someone rings the doorbell? Have an image from the surveillance camera appear on all TVs.

NOTIFICATIONS

Receive a text alert when a garage door is left open. Receive a text alert when your security cameras detect motion. Program the lights to flash three times when an exterior door

opens. Get a notification when the kids get home from school or when the liquor cabinet has been opened!

Need to be reminded to take out the rubbish?

Program a notification to appear on every mobile device at the same time once a week.

SETTING THE SCENE

Program your favourite settings into different "scenes" that you can activate with one button. For example, "Party" creates instant ambience with dimmed lighting and a customised playlist that starts automatically. A "Good Night" scene provides a push notification on your kids' iPad to turn off their TVs. The lights in each bedroom flash as a warning, and 10 minutes later the TVs switch off automatically and their remote controls and keypads get disabled for the night. "Wakeup" opens the blinds, gradually raises lighting and sets the temperature to your preferred level. Program it any which way to suit your lifestyle.

STATUSTECHNOLOGY.COM.AU | 1300 GO STATUS

SCENES

Landscape lighting can turn on automatically at sunset and off again at sunrise and a "Bedtime" scene can set bedside lamps at a level just low enough for reading. When you come home at night and the garage door opens, program the lights to turn on leading up to your door.

DIMMERS/SWITCHES

Control your lighting functions from a single button press, tap that same button two or three times and have automation bring your home to life. No longer is a simple light switch just a light switch, it is now your gateway to infinite possibilities in your home.

CUSTOM WALL PLATES

Do you often forget which switch on a wall operates what light? Wonder no longer with custom engraved keycaps. Name your areas anything you like. Perfect for families and the elderly.

ON-WALL TOUCH SCREEN

Control your entire home from a single dedicated touchscreen. Lighting scenes, Audio Visual devices, Air-conditioning, Security Cameras and more

WIRELESS LIGHTING

Retrofit an existing home with wireless lighting without the need to rewire the home. Our in house electrical division allows us to complete electrical work without the need to sub-contract.

PANELISED LIGHTING

This type of system is wired a different way to a conventional lighting system and requires each circuit to be run back to distribution boards where dimmer and relay modules are housed to hook up to the lighting circuits.

CAMERAS, SECURITY & SURVEILLANCE

TRESPASSERS BEWARE!

Secure your home... You don't have to dig a moat around your home or install missiles on your rooftop to keep the bad guys away. There are all sorts of ways that you can secure your home and the things (and people) inside it, however there's nothing more effective than a home security camera set up. With motion detection sensors placed around the house and connected to the camera they detect movement in different rooms. Security and surveillance systems can be controlled from anywhere in the world via a smart phone or tablet so you can enjoy your holiday in peace. Check the status of your security system, view your cameras and even lock the front door via your smartphone all while drinking cocktails on the beach in Hawaii.

TURRET

A turret camera, also known as a mini has a ball-and-socket type of design. It is like a sliced sphere, which can be easily swiveled around in its "socket" once the base has been mounted.

DOME

Dome security cameras get their name for the dome, eyeball or flat-faced dome camera, dome-shaped housings, which are designed to brave all the elements. The dome CCTV cameras are widely used inside and outside the home, in retail stores, hotels, etc. Due to the dome shape, it is almost impossible to tell which direction the dome surveillance camera is pointing at.

BULLET

Bullet security cameras are the video monitoring cameras shaped like rifles. The bullet surveillance cameras are often installed outside to a wall or a ceiling and point at a certain direction or angle.

PTZ

PTZ is an abbreviation for pan, tilt and zoom and reflects the movement options of the camera. Great for tracking objects through larger areas.

LICENCE PLATE READER

A long lense and high frame rate allow this camera to get clean images of moving vehicles and their licence plate.

REMOTE VIEWING

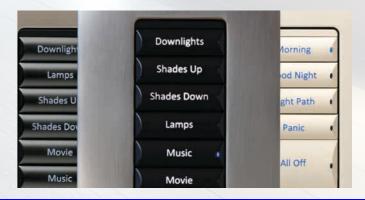

The ability to view security footage remotely from a computer, smartphone or tablet.

ACCESS CONTROL

Always losing your keys? Simplify access to your home with a custom access system. Keypads can be fitted with intercoms and discreet cameras to communicate with visitors. Doors can be locked and unlocked wirelessly from anywhere in the home or via your smartphone. Access cards and even biometric fingerprint readers can be used.

SMART DOOR LOCKS

Checking the mail ever left you locked out?

No more Locked – Out – freakouts.

Ever doubt you locked your front door?

No more Did – I – Lock – It? double checks.

Forget carrying around keys; lock and unlock your home with your smartphone. Share digital keys with friends and family, view access history and manage user settings, all from your app.

ALARM

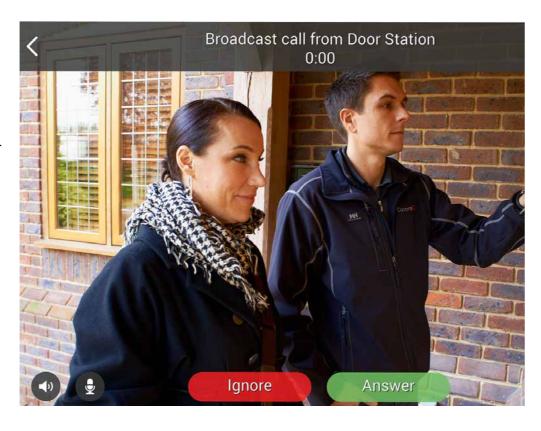

Get an immediate alert on your phone if a door opens or an alarm is set off. Door stations let you see who's at the front door, and multiple cameras provide complete views of the entrance. The initial cost of securing your home could save you thousands of dollars and considerable time in replacing stolen property and an alarm is the first step to doing so.

KEYPADS

No longer is a light switch simply a light switch - use it to arm the security system, open a door lock or turn on a TV to view the camera system whilst flashing your outdoor lighting. All from a single button press. Backlit buttons illuminate engraving for easy viewing. Assign any colour you desire. Choose from a wide range of keypads and button options.

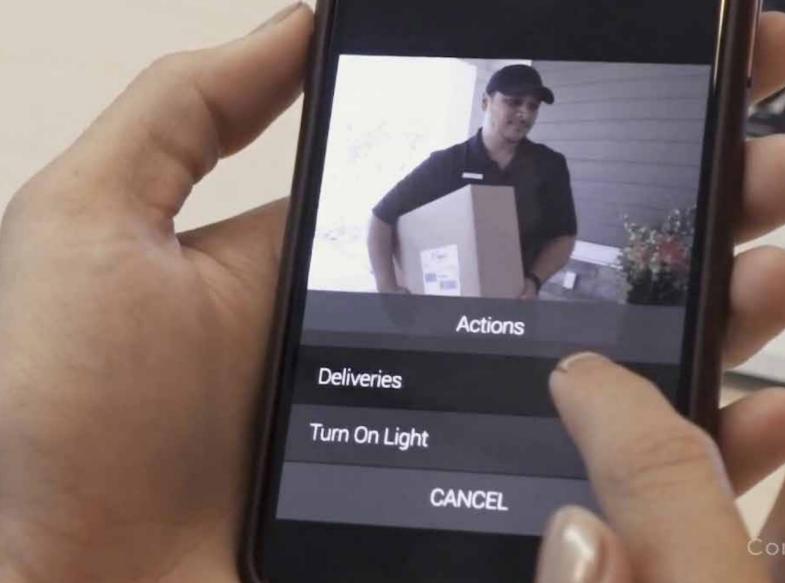

VIDEO INTERCOM

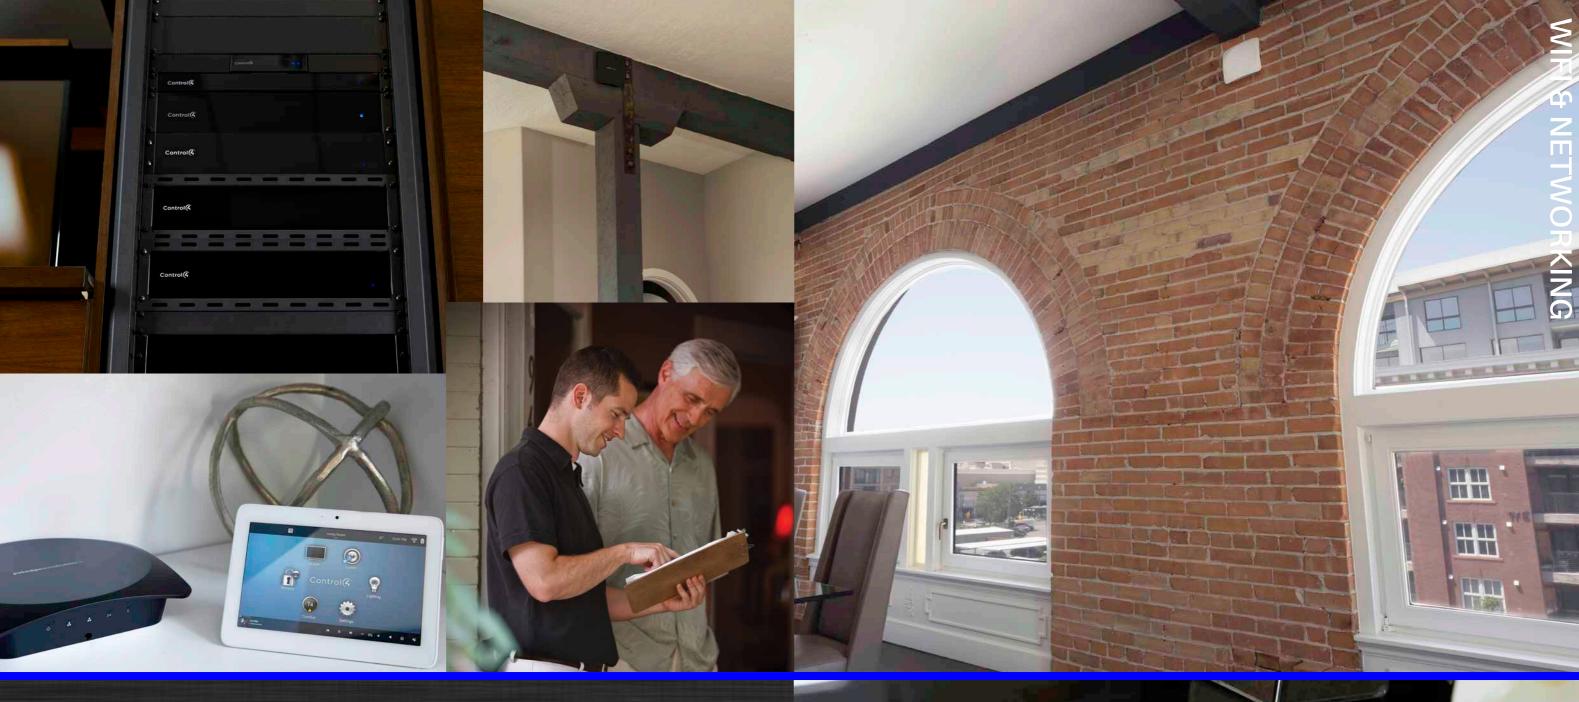

A video intercom lets you see who is at the front door, whether you are home or not. When the doorbell is pressed the camera fires up and sends an alert to your phone and you can see who's at your house. Let in trades and guests remotely or monitor who visits your home by integrating with a Home Automation system. This allows you to respond to the person at the door remotely by unlocking the door, activating lights, dropping window shades and more.

WIFI & NETWORKING

Why should homeowners invest in a professional-grade network? A smart home is only as smart as its network. Every smart device in your connected home is designed to communicate across a network of shared devices. Whether it's fully integrated AV and automation solutions throughout an entire home or a one-room solution, a professional-grade network is key for the ultimate connected home experience.

1. COVERAGE AREA

For the best wireless coverage in a home, wireless access points should be strategically placed. A good location may be in the ceiling above the living room or in a hallway.

2. USAGE

Streaming Audio and Video companies like Netflix, Amazon, Spotify, and Apple have made vast libraries of music, podcasts, videos, and TV shows available quickly and easily. Accessing these libraries throughout a home requires a reliable network.

3. HOW MANY DEVICES?

Not even counting the devices in your pocket, in your hand or on your lap, there are a lot of other devices in the home that need to be connected to make a home "Smart". With devices in a simple home now into the hundreds, you will need a reliable network to handle the communication between them.

4. ROUTING

Don't rely on your internet service provider to supply you with a decent enough router to run your whole home.

We bring you a new one to handle all of the traffic in today's latest high tech homes. Your router connects to your ISP and acts as the brain of your network, directing data to the right device. To get the most out of your network, you need a router that can handle high bandwidth, low latency multimedia traffic.

WIRING YOUR SMART HOME

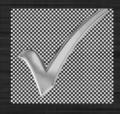

When choosing to pre-wire we look at future-proofing the home so that as technology rapidly advances your new home will not be left behind. Even when a whole home system will not be installed straight away, pre-wiring properly provides the ability to add in equipment and systems at a later date without opening up the walls and ceilings again. We create our proposals in stages so that the client can complete one or all of them at a time.

PRE-WIRING AT THE CONSTRUCTION STAGE

Pre-wiring is a vital stage of any new building or refurbishment and is often overlooked in the planning and design stage. Proper planning will eliminate multiple duplicated systems and result in a functional and effortless use of your electronics. Pre-wiring involves running necessary cabling during the home's framing construction stage or during renovations. The cost of running the cabling is very affordable during this phase so it makes sense to add this wiring during construction for anything you may want to do in the future.

OTHER BENEFITS OF CENTRALISED AV WIRING:

Adds value to a home and increases attractiveness to buyers.

Creates a strong network for the homes devices to run on and allows great WiFi everywhere.

Extra speakers or monitors to view or listen to content in different rooms can be then easily added at a later stage.

Allows wall-mounted and ceiling installed speakers.

Properly wiring for a home theatre is critical not only in ensuring best performance but best function as well.

Helps to 'future proof' your home for new technology advancements.

PRE-WIRE AND CABLING

In today's modern lifestyle we are all supposed to be IT gurus in our own world. If you are the most savvy on your phone everyone looks to you to fix their email issue or login crisis. In a home environment we all just expect things to work, however there is a process in making things work and that is correct cabling. When living on the forefront of technology you need to look forward. Pre-wiring your home is the 'looking forward as far as we can see at this moment in time'. There are various types of cables required to do this, and each of them have their specific duties. We don't expect you to understand all of these, but we do.

A. CATEGORY CABLING

Connecting all of the networked devices in your home. We use different coloured cabling to identify how they "talk" to each other.

D. FIBRE OPTIC

The way of the future. Hi-speed, hi-bandwidth, minimal investment. We live in a digital world, serviced by glass.

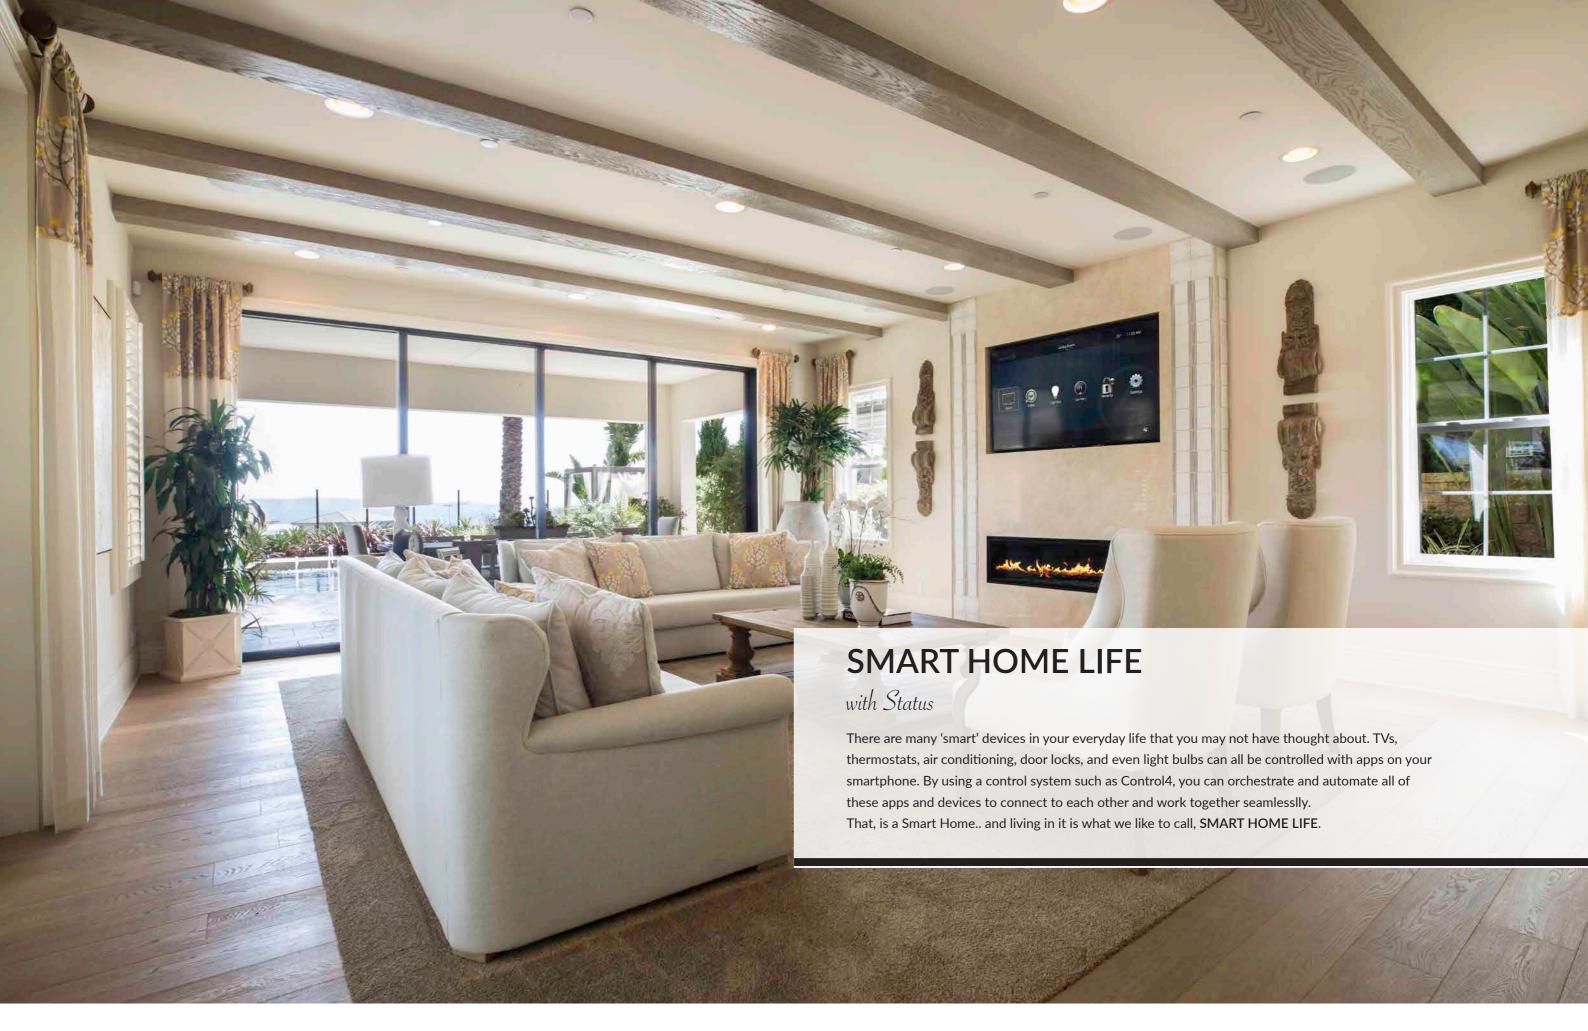

The Godsend of cabling. Sending hi-definition video and audio over short and long distances.

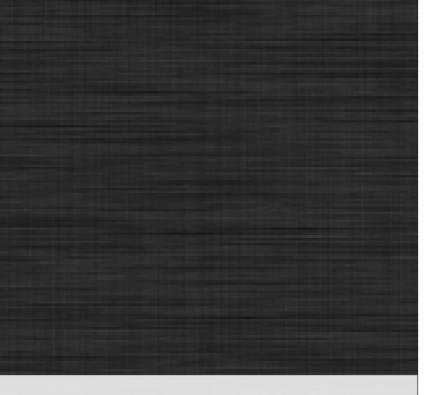

C. COAXIAL

This one brings us the Free-to-Air TV and Foxtel viewing pleasures as well as high speed internet.

ONE ZONE STARTER PACK

THE 'SIMPLE'

ONE ZONE SOLUTION

This package is all about Voice Control and Automation. If you've been considering automating your home but unsure where to start then look no further.

It's the simple things.. like when you just sit down with your coffee and get comfy and then realise you left the kitchen light on and it's shining right in your eyes. "Alexa, turn off kitchen light" takes care of that. Let's just say it's a little more fun than getting up. Sick of a mess of remotes or constantly reminding your partner how to use the TV? One simple universal Smart Remote will take care of that. Want to be able to turn the TV down from upstairs when the kids have it on too loud? This package allows you to do this stuff simply and easily with either app or voice control.

PACKAGE INCLUSIONS

*CONTROL4 EA1 KIT WITH HANDSET

Your Universal Remote that replaces all other remotes for your media in that room (including Foxtel) and the brains of the operation.

*CONTROL4 LIGHTING CONTROL CIRCUIT

Operated with voice or through the app.

2x Lighting circuits included. Add-on extra circuits from this starting point from \$300 per additional circuit.

*CONTROL4 SMART KEYPAD WITH DIMMER

1x Smart keypad for your main operation in this room. Control the lights, Control the volume, Control the TV. Choose from black, white or silver.

*PHILIPS HUE COLOURED LIGHT GO

Create a cool colour effect in your voice control zone.

Operated with voice or through the app.

*AMAZON ECHO WITH ALEXA

Voice Control unit. Additional units can be added.

*AMAZON ECHO DOT

Additional Voice Control unit for bedroom.

*PRE-WIRING, INSTALLATION, PROGRAMMING

Yes it's all included, no stitch ups, no extras. You choose this package and you get all of this cool tech fully installed and programmed. Price applies to new builds only. Retrofit installations will incur additional labour costs.

EXTRAS:

All packages are customisable and can be added to. The following are some extras that we can integrate into your new Smart Home or Smart Room:

*STREAMING AUDIO THROUGH AWESOME SPEAKERS.

*AUTOMATING YOUR LIGHTS THROUGH THE REST OF YOUR HOME

*EXPANDING YOUR WIFI COVERAGE TO EVERYWHERE IN YOUR HOME

*ADDING EXTRA ZONES

PACKAGE INCLUSIONS

*CONTROL4 EA1 KIT WITH HANDSET

Your Universal Remote that replaces all other remotes for your media in that room (including Foxtel) and the brains of the operation.

*AMAZON ECHO WITH ALEXA

Voice Control unit.

*BRAND NEW 65" SAMSUNG TV

Includes a 4k Samsung 65" flatscreen TV, wall mounted professionally in your new Smart Room. Concealed wiring and equipment for a sleek finished installation. We house the controller and amplifier behind your new TV so this installation is seamless.

*2.1 CHANNEL ENHANCED AUDIO SYSTEM

Includes a Triad One hi-resolution streaming amplifier. Your choice of speaker pair - choose from bookshelf, in-ceiling, in-wall or soundbar. Outdoor speaker options available also such as patio box speakers or speakers disguised as rocks. Tie this all together with a 10" Triad powered subwoofer for thumping bottom end bass.

*CONTROL4 LIGHTING CONTROL CIRCUIT

Operated with voice or through the app. 2x Lighting circuits included. Add-on extra circuits from this starting point from \$300 per additional circuit.

*CONTROL4 SMART KEYPAD WITH DIMMER

1x Smart keypad for your main operation in this room. Control the lights, Control the volume, Control the TV. Choose from black, white or silver.

*PHILIPS HUE COLOURED LIGHT GO

Create a cool colour effect in your zone with this colour-changing light bowl that can sit anywhere. Operated with voice or through the app.

*PRE-WIRING. INSTALLATION, PROGRAMMING

Yes it's all included, no stitch ups, no extras. You choose this package and you get all of this cool tech fully installed and programmed. Price applies to new builds only. Retrofit installations will incur additional labour costs.

EXTRAS:

All packages are customisable and can be added to. The following are some extras that we can integrate into your new Smart Home or Smart Room:

*AUTOMATING YOUR LIGHTS THROUGH THE REST OF YOUR HOME

*EXPANDING YOUR WIFI COVERAGE TO EVERYWHERE IN YOUR HOME

*ADDING EXTRA ZONES

THE 'SMART ROOM'

ONE ZONE SOLUTION

Choose 1 room or open-plan area in your home that you would like us to automate. Think where you would get the most benefit out of our Smart Home technology and we will elevate that room and turn it into a SMART ROOM.

When we are finished you will be able to lounge in your favourite chair and control the room without getting up. Using voice commands you can fire up the TV and bring up Foxtel, dim the lights, turn on the corner lamp and set it to blue, turn off the distant kitchen light and set yourself a timer for when to get up to start dinner. Ahhh...

And how about that sound? And that hi-definition TV?

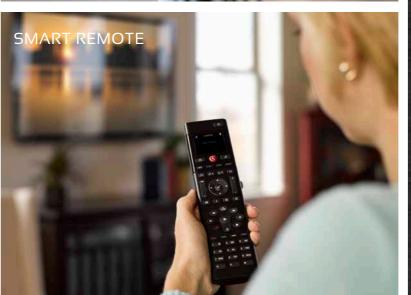

Wow. Grow your Smart Home Life zone-by-zone as you figure out what works for you and what you could live without. If a bit of fun and a whole lot of convenience is what you are seeking then The Smart Room One Zone Solution could be the perfect fit.

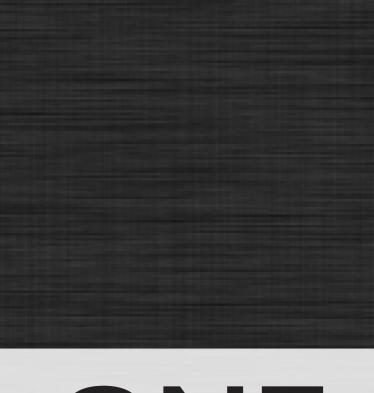

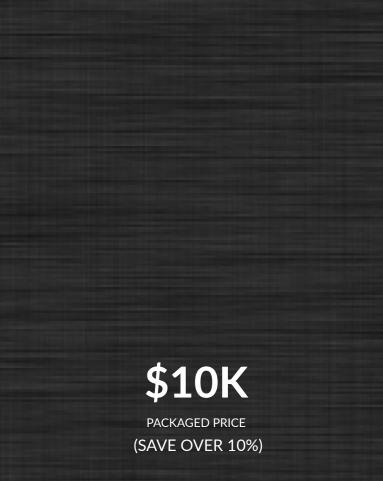

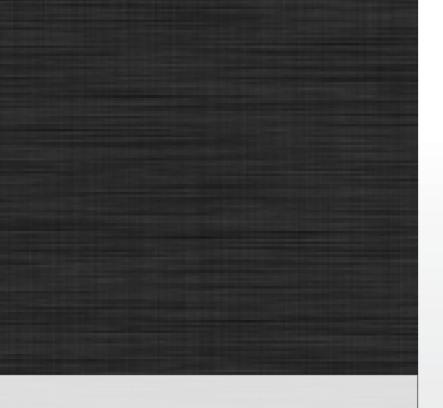

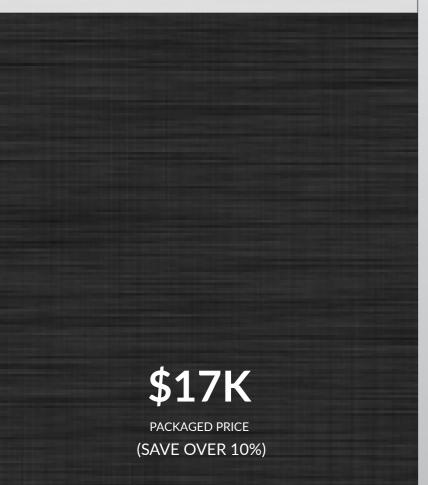

ONE ZONE SOLUTION

TVO ZONE SOLUTION

THE 'COMFY & COSY'

TWO ZONE SOLUTION

This package is for those who like to chill out in the lounge but also in the bedroom. You get everything from the Smart Room solution plus a little something more.

In the bedroom we add flush-mount ceiling speakers and a 40-inch Samsung flatscreen for an immersive audio-visual experience. Automated lighting and programmed scenes mean you can dimly light your way to the ensuite or set a romantic scene with a touch of a button or a voice command. An Amazon Dot in the bedroom means you have voice control ability to control not only this room, but your other chosen room as well.. all from lying in your bed.

PACKAGE INCLUSIONS

*CONTROL4 EA1 KIT WITH HANDSET

Your universal Smart Remote that replaces all other remotes for your media in that room (including Foxtel) and the brains of the operation. You get one for the lounge and one for the master bedroom. This will also give you full app control over your new 'Comfy and Cosy' solution

*AMAZON ECHO WITH ALEXA

Wall-mounted Voice Control units in both zones for a clutter free finish. Additional units can be added.

*PAKEDGE HOME NETWORK AND WIFI

We don't take chances with relying on your internet service providers router and WiFi to run your new Smart Home. We install a new one to handle all of the traffic in today's latest tech homes and give you the WiFi coverage you've only imagined was possible.

*4-ZONE CCTV SECURITY SYSTEM

An 8-channel recorder with 4 hi-definitiion cameras will be installed to monitor your new home. With wiring included to 8 locations, you can add an additional 4 cameras on reauest.

*EOUIPMENT RACK

A small sized equipment rack has been allocated for this fit-out to house all of the coolest tech to run your new Smart Home. Equiped with cooling and ventilation for temperature control

*PRE-WIRING, INSTALLATION, PROGRAMMING

Yes it's all included, no stitch ups, no extras. You choose this package and you get all of this cool tech fully installed and programmed. Price applies to new builds only. Retrofit installations will incur additional labour costs.

This package is geared towards those who love to entertain and are music and TV lovers themseves. With 6 zones of audio and video to allocate, you can indulge yourself with some quality speakers or a sneaky flatscreen in all sorts of places.

Why not put a flatscreen in your Master bath so you can take time out and enjoy yourself, deck out your patio or make a sanctuary out of your walk-in robe? Maybe you do a lot of work in the garage and need some tunes in there.. or maybe

you have a dedicated listening room where you listen to old vinyl and drink scotch. 'Alexa' lets you control your zones from anywhere she can hear you.. And she's a pretty good listener. Bellow in from outside "ALEXA MUSIC 10" and BAM up it goes! ..winning. The Control4 Smart Remote (handset) fits neatly in your hand and has all the button instinctively placed for ease of use. After a lifetime of remote control use we find they're something people still want in their TV room.

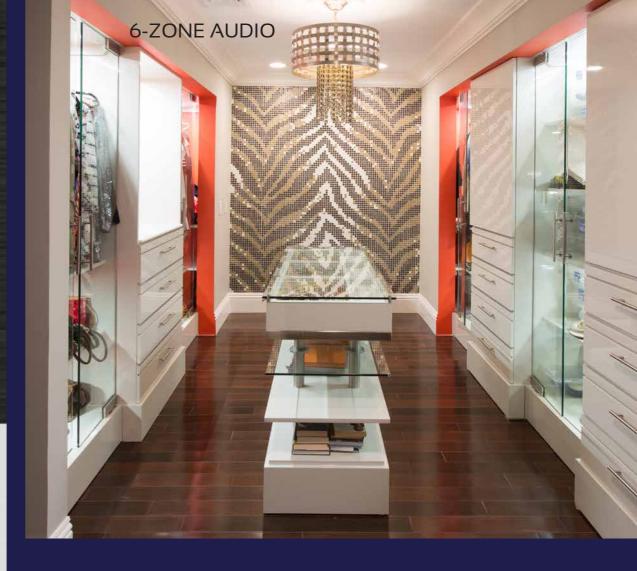

THE 'ENTERTAINER'

SIX ZONE SOLUTION

PACKAGE INCLUSIONS

*TRIAD 6-ZONE MULTI-ROOM AUDIO SYSTEM 6 zones of audio with 3x pairs of 8" in-ceiling speakers; 1x pair of outdoor speakers; plus 1x single stereo speaker perfect for your walk-in-robe.

*SURROUND SOUND SYSTEM

The 6th zone. We will completely transform this zone into an amazing 5.1 channel Surround Sound experience.

*CONTROL4 EA3 KIT WITH HANDSETS

Your Smart Remote that replaces all other remotes for your media in that room (including Foxtel) and the brains of the operation. A new handset for each of the 6 video zones. Full app control over the entire home system.

*AMAZON ECHO & ECHO DOT WITH ALEXA Voice Control units. Additional units can be added.

*CONTROL4 LIGHTING CONTROL CIRCUIT

Operated with voice or through the app. 10x Lighting circuits in total included. This includes 6x keypads for your main light switches in each zone. Choose from black, white or silver.

*CONTROL4 7" TOUCHSCREEN

Choose from a wall-mounted or table-top touchscreen for simplified control of all of the new Smart devices we will be installing in your home.

*PHILIPS HUE COLOURED LIGHT BULB For 3 lamps of choice.

*APPLE TV Smart video streaming

*WALL MOUNTING OF 4x TVS

We have included all of the cabling and bracket hardware required to mount 4 of your favourite TVs flat on the wall with all wiring concealed. (TVs not included in this package)

*PAKEDGE HOME NETWORK AND WIFI

We don't take chances with relying on your internet service providers router and WiFi to run your new Smart Home. We install a new one to handle all of the traffic in today's latest tech homes and give you the WiFi coverage you've only imagined was possible.

*6-ZONE CCTV SECURITY SYSTEM

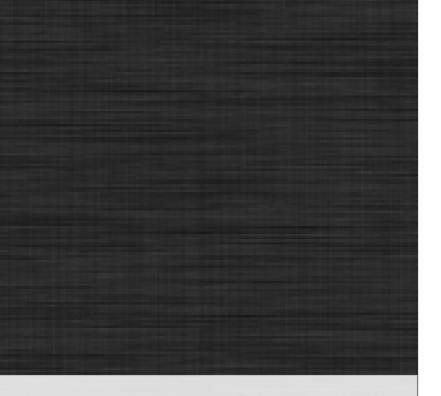

An 8-channel recorder with 6 hi-definition cameras will be installed to monitor your new home. With wiring included to 8 locations, you can add an additional 2 came<u>ras on request.</u>

*EQUIPMENT RACK

A medium sized equipment rack has been allocated for this fit-out to house all of the cool tech.

*PRE-WIRING. INSTALLATION. PROGRAMMING

Yes it's all included, no stitch ups, no extras. You choose this package and you get all of this cool tech fully installed and programmed. Price applies to new builds only. Retrofit installations will incur additional labour costs.

WHOLE HOME SOLUTION

THE 'SMART HOME' WHOLE HOME SOLUTION

This package is for those who want total control. Whether you are at home or away, you are always in control.

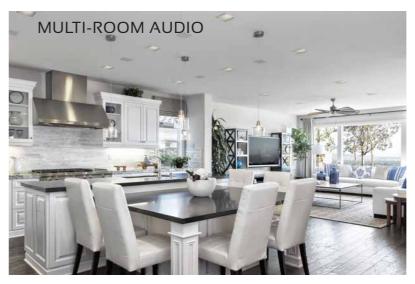

Want to be able to see who is calling at the front door or whether or not you shut the garage just by looking at your smartphone? Then this package is for you. Want to entertain your family with the latest movie in amazing Surround Sound, boast seamless WiFi thoughout your entire home and be able to monitor your home on your phone and control it all from afar? Then this package is for you. With a combination of all of the best elements of our smaller packages plus more, with amazing savings, this package is for YOU! You won't believe how convenient it is to be able to ask 'Alexa' out loud for the time, set a timer or play music without getting up. Not to mention turning off that annoying lamp right as the movie is starting and you've just got comfy. Ahhh... Lovin' that Smart Home Life.

OUTDOOR SMART LIGHTING

REMOTE MONITORING
